Proud to be Green

100% of our Polyester Fiber Comes From Post Consumer and Industrial Recycled Waste

All of the synthetic (polyester) fiber used in floor pads produced by Americo comes from recycled materials. Primary sources of these materials are recycled soda and water bottles.

Environmentally Friendly Products

Our products are developed with sustainability in mind. We use recycled materials and some pads have been designed to eliminate the use of harsh chemicals when cleaning or stripping floors.

Water Based Latex Resins

No phenol-formaldehyde resins are used in our binding process. We only use water-based latex resins.

Recycled Packaging

All of our shipping cartons contain at least 45% recycled materials.

New State-of-the-Art Equipment

We've installed new multi-million dollar state-of-the-art equipment, increasing our energy efficiency by more than 30%.

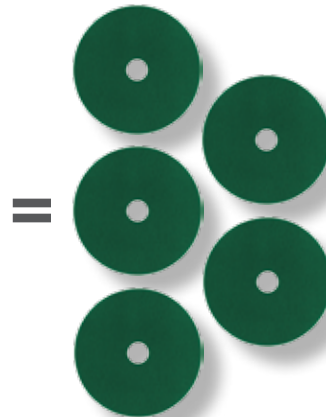

Waste Water Reduction

Our in-house water treatment facility has reduced our waste water flow by 83%.

We use 100% RECYCLED FIBER

We are proud to contribute to our customers' sustainable position by supplying environmentally friendly products. Prevent used water bottles from going into landfills by using products manufactured by Americo.

Full CycleTM Eco-Friendly Floor Pads

Why Accept Anything Less?

- Made from 100% recycled PET plastic.
- Specially formulated to biodegrade in a fraction of the time that it takes conventional floor pads once discarded into an active landfill.
- Leaves no toxins or toxic remnants in the environment.
- Methane, a by-product that occurs during the biodegradation process, can be captured and converted into energy where facilities exist.*

*For a current listing of The U.S. Environmental Protection Agency's Landfill Methane Outreach Program (LMOP) visit <http://www.epa.gov/outreach/lmop/index.html>.

ENHANCED BIODEGRADATION
PAT. PEND.

Samples A and B, shown above, were both taken from the same Full CycleTM floor pad. While Sample A was left untouched, Sample B was placed in an ASTM D5511 simulated landfill test for 290 days. Note the significant mass reduction via enhanced biodegradation in Sample B. Photo courtesy of Eden Labs LLC.

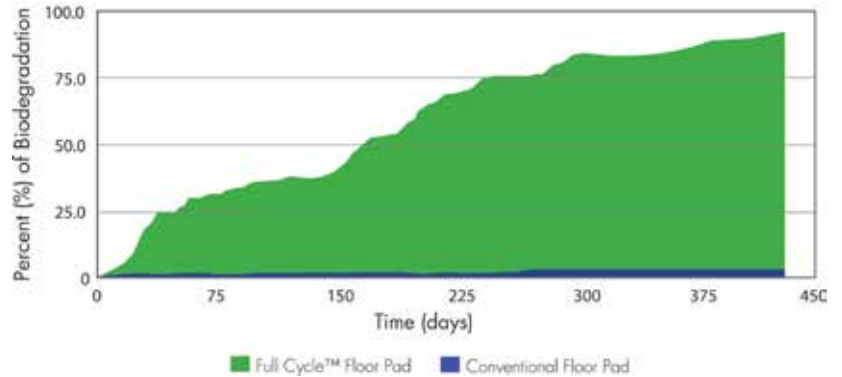

High Quality & Performance

With Americo floor pads, our customers don't have to sacrifice quality or product performance to leave a green footprint. Our innovative biotechnology does not modify Americo's core pad formulation. Our products have the same high quality, product performance and consistency that customers have come to expect from Americo.

BIODEGRADATION COMPARISON

Full CycleTM Floor Pads versus Conventional Floor Pads

ASTM D5511 testing shows 90% biodegradation of Americo's Full CycleTM floor pad as compared to less than 7% on our conventional pads. The ASTM D5511 test is a method that evaluates the biodegradability of plastic in anaerobic or oxygen-less conditions. These laboratory tests often show faster results than actual landfill conditions. The actual rate of biodegradation of Americo's Full CycleTM pads, as well as the rate of all plastic materials in landfills, will be slower and will vary, dependent upon actual landfill conditions.

California Notice: California law prohibits the sale of plastic packaging and plastic products that are labeled with the terms 'biodegradable', 'degradable', or 'decomposable', or any form of those terms, or that imply in any way that the item will break down, biodegrade, or decompose in a landfill or other environment. These restrictions apply to all sales in or into the State of California, including such sales over the internet.

TWISTER™ PADS DIAMOND CLEANING SYSTEM

Hybrid™ Red

Removes scratches, wear and staining on natural stone and terrazzo floors.

Hybrid™ Black

The Hybrid™ Black is the most aggressive of the Hybrid™ series. It will remove minor scoring, lippage, excessive wear and staining.

Hybrid™

The Hybrid™ method is a combination of both light grinding and the Twister™ maintenance method that will refurbish a worn stone floor with major scratches or "orange peel". Start with the Hybrid™ Black disc and immediately follow up with the Hybrid™ Red disc for light grinding of the stone surface. Finish by using the standard Twister™ process to bring up the shine.

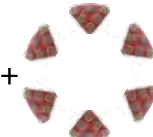

The Hybrid™ tools consist of three different items; the pad holder, the pad and segments. The pads are sold in pairs and the holders individually. The segments are sold in boxes of six.
