Cavalier Inc. Endorses:

Cascades North River™ Towel & Tissue

With the rapid growth in green product claims, users need to know which claims can be verified. North River® 100% recycled towel and tissue products are Certified Green™, providing assurance that you are purchasing one of the most environmentally responsible brands available. North River's third party certifications include Green Seal®, EcoLogo™, and Processed Chlorine Free® - more than any competitive brand. Moreover, North River® is the answer to the growing problem of greenhouse gas emissions and is also the first and only brand to offset 100% of the electricity used for its production with Green-e® certified renewable wind energy. This helps to reduce our carbon footprint - and yours - for a more sustainable future.

Environmental Solutions:

- * 100% recycled
- * 60-100% post-consumer fiber
- * The ONLY 100% post-consumer fiber towel (North River Ivory for Tandem)
- * Third-party certifications: Green Seal - EcoLogo - Processed Chlorine Free
- * Using Green-e certified wind energy

Quantifying North River's Environmental Benefits:

Your purchase of 100 cases combined of North River natural towel and bath tissue (22 lbs. net avg.) conserves valuable environmental resources.

- * 19 trees saved
- * 5,511 lbs landfill waste avoided
- * Energy savings equal to using a 100W bulb for 7 years
- * 2,900 lbs CO2 emissions prevented
- * Reduced water usage by 20,600 gallons

Cascades Anti-Bacterial™ Hand Towels

cascades®

A world first in terms of hand hygiene.

Cascades® new antibacterial hand towel:

the only product that optimizes hand hygiene by its lasting effectiveness.

the only product that optimizes hand hygiene by its lasting effectiveness.

Cascades® new antibacterial hand towel.

Cascades® green Antibacterial hand towel is the only product that **optimizes hand hygiene**. This innovative product significantly reduces the quantity of residual bacteria left on your hands and minimizes the risks of contamination by providing a **lasting antibacterial effectiveness for 30 minutes**. The 1st *intelligent paper*™ compensates for people's imperfect hygienic practices without changing their habits. Hands are therefore protected of future contamination, an important benefit not offered by most hand hygiene products on the market. The product is effective even in areas with limited water supply. Unlike other antibacterial products, Cascades® Antibacterial hand towel **has no expiration date**; facilitating inventory management. It is an essential addition wherever hand hygiene and protection from bacteria are concerns.

Cavalier Inc. Endorses:

Cascades Moka™ Tissue

The greenest bathroom tissue of them all...

Easily recognizable by its beige color, Cascades Moka bathroom tissue is made from 100% unbleached recycled fiber and is the most environmentally responsible choice on the market. By adding 20% corrugated box fiber into the pulp mixture and eliminating bleaching chemicals, we've achieved an amazing feat: reducing the environmental impact of our raw material by 25% without reducing the softness of our bathroom tissue. This innovation, which eliminates the bleaching stage of the fiber, reduces greenhouse gas emissions by 30% compared to our greenest white bathroom tissue, also made from 100% recycled fiber.

Environmental Solutions:

- > 100% unbleached recycled fiber
- > Contains 80% post-consumer material
- > Contains 20% corrugated box fiber
- > Contains 0% bleaching chemicals
- > Produces 30% less greenhouse gas emissions
- > Third-party certifications: Processed Chlorine Free - Green Seal - EcoLogo
- > Using Green-e certified wind energy

Life Cycle Analysis

A detailed life cycle analysis (LCA) of the new pulp mix used in Cascades® Moka™ revealed a reduction in overall environmental impact by at least 25% when compared to the pulp mix used in the traditional Cascades 100% recycled fiber bathroom tissue. The latter had been regarded as the sustainable tissue exemplar in recent years even though it includes a chlorine-free whitening process for aesthetics. The reasons behind this reduced impact fall into three categories studied in the LCA:

- > human health
- > ecosystems
- > natural resources
