**PARTS AND ACCESSORIES
CATALOG**

Tel: 800-872-4472

Fax: 888-872-4472

www.gracomfg.com

For your convenience and quick reference, we have created the catalog in 2 sections.

The recommended usage of each section is outlined below.

OEM INTERCHANGE

The first section of the catalog is the OEM Interchange. In this section you will find OEM (Original Equipment Manufacturer) part numbers listed to the left, with our recommended Graco part number to the right. If you are familiar with the OEM number of the part needed, this is the quickest way of identifying our Graco number.

GRACO PARTS BY CATEGORY

The second section of the catalog contains a complete listing of Graco parts by product category. In this section you will find detailed descriptions, dimensions, recommended usages, and images of Graco items.

For your convenience there are three features in this section to enable you to find the correct part. First, we have classified the listings under certain categories according to OEM and OEM part number. Second, many categories contain OEM machine reference charts that let you search for parts based on a specific machine.

You will find this helpful in locating items such as batteries, battery chargers or vacuum motors. Finally, we have included alphabetical part listings with detailed descriptions and photo indexes.

At Graco, we're very excited about this new catalog and look forward to your comments and suggestions on how to better serve you!

Visit our website for the most current and complete OEM interchange

PAYMENT TERMS: Approved accounts - Net 30 days from date of invoice.

PAYMENT METHODS: Visa, MasterCard, AMEX, or Open Account with approved credit.

RETURNED CHECKS: There will be a service charge of \$25.00 on each returned check.

FREIGHT: All orders are F.O.B. Blackwood, NJ. Part orders exceeding \$1250.00 (\$500 OnLine) (Excluding batteries, engines) will be shipped freight-free within the continental U.S. or to port of export on foreign shipments. Carrier selection is at the discretion of Graco. (Blue label or red label charges are not included in free freight offer.) All other shipments, excluding back ordered parts, will incur the appropriate freight and handling charges.

Transportation companies are responsible for any shipment damages or discrepancies once shipment has left the Graco warehouse. Carefully inspect all packages before accepting from carrier. Truck shipments require a claim to be submitted directly to the carrier or the claim may not be honored. U.P.S. shipment damage requires inspection of the package by a U.P.S. Inspector. Any concealed damage must be claimed to the carrier within 10 days of receipt. Original shipping container must be kept until claim is reconciled. Please notify Graco of any shortages.

BACK ORDERS: Parts temporarily out of stock will be automatically shipped and invoiced when available unless order indicates "do not ship back order". Appropriate shipping charges will be added to the invoice excluding any additional handling charges.

PRICING: All prices are subject to availability, and may change without notice. Please verify at time of order.

WARRANTY: Graco parts are warranted for 90 days from date of purchase to be free of defects in materials and workmanship, excluding batteries, battery chargers, motors and pumps which carry their own 1 year manufacturer's warranty. Items damaged due to abuse, accidental damage, improper use or lack of care are not covered by warranty. Normal wear parts including cords, rubber items, hoses, and brushes are excluded from warranty. All warranties must have prior authorization by Graco to qualify for reimbursement. All warranty inquiries should be directed to your Customer Service Representative. The foregoing is in lieu of all other warranties, expressed or implied, and constitute Graco's only obligation with respect to parts. Graco assumes no liability for individual or consequential damages.

RETURNS: No return of parts will be accepted without prior approval by Graco. A complete Return Goods Authorization must accompany all returns and can be obtained by contacting your Customer Service Representative. All returned merchandise will be charged a 20% restocking fee unless covered by warranty or shipped in error. Merchandise for return must be filed within 30 days of receipt. Issued returns are only valid for 30 days. After 30 days return authorizations will be voided. Freight charges on all product(s) returned including warranted parts are the responsibility of the customer. All returned merchandise must be sent pre-paid by UPS or FEDEX Ground only. No COD shipments will be accepted.

Aftermarket Parts & Accessories

Graco sells top quality batteries to our customers.

Graco is proud to offer AGM batteries in addition to our Flooded line. Below are the features of each type, so no matter what the need, you'll find the right battery for you.

FLOODED BATTERY

- Most common lead-acid battery in use today with years of proven success.
- Provides massive amounts of reserve power.
- Great life expectancy with proper maintenance.
- Lowest manufacturing cost.
- Dependable against harsh conditions.
- Low tolerance for heat (for every 15° F above 80° F, they will lose half of their service life)
- High self discharge rate
- Must be installed upright
- Not suitable for high vibration

SEALED LEAD ACID (AGM) BATTERY

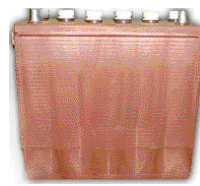

- Increased surface area of the plate helps retard corrosion and extends the life of the grid.
- The use of thicker grids gives more corrosion resistance.
- Plates are never subjected to destructive ultra-deep discharges due to their "acid-starved" nature.
- AGM batteries have the best balance between capacity utilization and recombination efficiency by containing separators at the ideal compression and saturation. These dual insulating separators also prevent separator misalignment as well shorting at the bottom and sides of the plates.
- Excels in high current, high power applications and in extremely cold environments.

Belt Types

GRACO offers high quality belts in a wide variety of types and lengths to fit almost any machine. If you're not sure what belt you need to order, please see the guide below for help. If you need further assistance, please a contact Customer Service representative at 1-800-872-4472.

POLY V-BELT

Poly V belts have length-wise grooves, which optimize contact area, resulting in increased power transfer.
See page 85

ROUND

Round belts use friction to stay in contact with pulleys and must be stretched or elongated to provide good driving friction. They are best used in light-to-medium duty power transmissions.
See page 85

Length	GRACO#/Old Graco#
4-1/8"	8.660-088.0/ BLE-3
3-9/16"	8.682-892.0/ BLH-2

V-BELT

V belts are the most widely used transmission belt. They are both economical to use and easy to replace.

Graco Manufacturing Helps You Save Time And Money With Our Industrial Brush Line.

Cylindrical Sweeping Brushes (Main Brooms)

Our main brooms are designed for maximum performance. Built with the highest quality bristle materials, staple set to heavy duty precision extruded cores.

A variety of bristle materials and patterns are available to meet different sweeping conditions.

6 and 8 Double Row (Low Density) – are best for general purpose sweeping. Spacing between the rows allow for the pick up of bulkier litter.

- Nylon – 6 or 8 row design – a great choice for most litter and surface conditions. Longest lasting and good hopper loading – medium dust conditions – OK for high temperatures - not for wet conditions.
- Polypropylene – 6 or 8 row design – a good economical selection for most litter and surface conditions. Good brush life – for medium dust conditions – retains stiffness when wet – not for higher temperature debris.
- Polypropylene and Wire – 6 or 8 row design – stiff poly bristles for loading debris and wire to loosen encrusted dirt - for light dust conditions - retains stiffness when wet – not for higher temperature debris.
- Crinkle Wire – 6 or 8 row design – used when aggressively sweeping heavy compacted dirt. Recommended for dry, low dust sweeping – OK for high temperatures.
- Fiber and Wire – 6 or 8 row design – combines fiber for light to moderate dust conditions with wire for loosening lightly compacted dirt and better hopper loading.
- Nylon Patrol design – excellent brush life – the “V” shaped pattern is for sweeping large area at high speeds – superior hopper loading - not for wet sweeping.
- Proex – 6 or 8 row design – this blended polypropylene brush is an excellent choice for all purpose sweeping. Retains stiffness in wet conditions – not for high temperature sweeping – good for picking up paper, sand, gravel and lighter less bulky litter.
- Proex and Wire – 6 or 8 row design – more aggressive sweeping than Proex – with wire added for loosening compacted dirt and loading of heavier debris.
- Union Mix (Natural Fiber) – 6 or 8 row design – this natural fiber material is used for dust and smaller light debris. Not recommend for wet applications.
- Polypropylene Sand Wedge design – this intense zigzag wedge pattern is for picking up fine debris. Poly remains stiff in wet conditions.

18 and 24 Single Row (High Density – Full Fill) – the choice for fine heavy dust conditions, including sand and minimal light debris.

- Nylon – 18 or 24 Single Row – long lasting nylon - excellent choice for severe dry dust conditions – ideal for rough surfaces – not for wet sweeping.
- Fiber and Wire – 18 or 24 Single Row – dense natural fiber for heavy dust conditions – with wire added for loosening light compacted dirt.

Extending Main Broom Life & Maximizing Performance

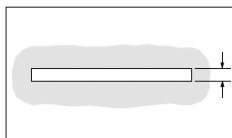

To lengthen brush life, rotate the main broom, end to end, after 20 hours of operation. This prevents the bristles from becoming set or worn in one direction. Only operate the brush in the full down or floating position on very uneven floors. Doing so leads to premature bristle wear.

For even bristle wear and proper performance, periodically test the brush pattern for proper adjustment.

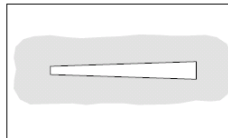

This is done by making or burning a pattern on the floor or pavement. With the machine stopped, lower the rotating main broom for about 30 seconds. Without moving the machine, raise the brush and move the machine. When properly adjusted the pattern should be rectangular and 2”-2.5” wide.

A thinner pattern doesn't allow enough bristle contact for flicking debris into the hopper and uneven surfaces. A wider pattern leads to premature bristle wear.

Properly Adjusted Main Broom

Improper Main Broom Pattern

Side Sweeping Brushes

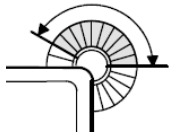

Made in a variety of diameters to meet OEM specifications, our side brooms are made using long lasting quality materials.

- Polypropylene – most commonly used economical material for general purpose sweeping. Retains its stiffness when wet – not for high temperature debris
- Nylon – same sweeping characteristics as poly – longer lasting – not for wet sweeping
- Flat Wire – for outdoor heavy duty sweeping of high temperature debris, wet mud and compacted materials

Extending Side Brush Life & Maximizing Performance

The purpose of side brush is to move debris away from a curb, wall or structure, so it can be picked up by the main broom. To prevent debris from being moved away from the machine and premature brush wear, the side brush should be properly adjusted.

The illustration below depicts the ideal brush angle for proper contact with the floor.

Cylindrical Scrub Brushes/Rotary Scrub Brushes

Graco cylindrical and circular rotary brushes were designed to meet or exceed the specifications of the OEM, for fit and performance. We offer a wide spectrum of bristle materials, suited for light duty through heavy aggressive scrubbing requirements. The number of rows (12, 14, 18, 20, and 24) vary by brush and OEM standards.

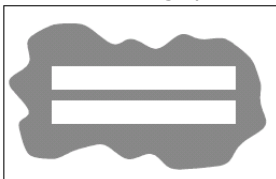

Our top quality rotary brushes come with clutch plates or mounting hardware. Full fill pattern offers contact on uneven floors.

- Polypropylene – economical choice for general purpose light to medium duty aggression.
- Stiff Polypropylene – a more aggressive alternative to poly.
- Nylon – longer lasting than poly, a good choice for general purpose light to moderate scrubbing.
- Prolene – polypropylene material for medium-duty scrubbing. Used on concrete, terrazzo and vinyl tile.
- Grit – silicone carbide particles impregnated in each bristle for mild to very aggressive scrubbing – long lasting
 - 46 Grit for the most aggressive scrubbing of concrete, terrazzo
 - 80 Grit for moderate to aggressive scrubbing of concrete, terrazzo, and quarry tile
 - 180 Grit for lighter to moderate scrubbing of concrete, terrazzo, quarry tile, vinyl
 - 240 Grit for general cleaning of concrete, terrazzo, and quarry tile
 - 500 Grit very light scrubbing of terrazzo, quarry tile, marble, vinyl tile, rubber floors
- Polyester – very long lasting high quality brush for general duty scrubbing – suitable for painted or epoxy coated floors

Extending Cylindrical Brush Life & Maximizing Performance

For even bristle wear and proper performance, periodically test the brush pattern for proper adjustment. This is done by making or burning a pattern on the floor or pavement. With the machine stopped, lower the rotating scrub brushes for about 30 seconds. Without moving the machine, raise the brushes and move the machine. If the pattern is even across the brush width, the brushes are adjusted properly.

When rotating cylindrical scrub brushes, rotate the front brush to the rear. They can be flipped end to end as well.

Short-Trim Pad Drivers

Our short-trim pad drivers are made with shower feed molded plastic blocks and stiff poly bristle fill. Staggered bristle length grips the pad, while center-lock pad holders are included, for excellent pad gripping performance.

Graco Legacy Air Mover - LAM³

GRACO#
1.004-014.0

3 Speed Air Mover

Features

- 3 speeds of air movement for every type of job.
- A maximum air movement of 3,000 cfm for rapid drying of carpet and hard floors.
- Sturdy, four point motor mount to withstand heavy use and rough handling.
- Built in carpet clip for flood restoration jobs.

Equipment

GRACO specifications

- Rotationally molded polyethylene construction with molded offset handle and cord wrap
- 0.5 hp (373 watts) motor with continuous duty, capacitor start, thermally protected with four-point mount
- 9.6" dia x 9.1" wide fan wheel
- Fan speeds ranging from 1050 rpm - 1600 rpm
- Color: Gray
- Airflow from 2000 cfm - 3000 cfm
- 25 ft power cable with 16/3 SJTW and three-wire molded plug
- 120 volt AC, 60 HZ
- 20" long, 16" wide, 18.8" high, and 33.5 lbs
- **Purchase 20 or more LAM³ Air Movers and we will personalize the air movers with your logo and information**
