# Welcome

Witt Industries is proud to present our latest product offering in the form of this catalog.

The icons below will be used throughout the catalog to help identify products for your ease of use. Witt has a proud history of more than 125 years in the waste and recycling receptacle industry, with outdoor benches, planters and other accessories available as well. For questions, concerns or to place an order, please contact Witt Industries at 800-543-7417, on the web at [witt.com](http://witt.com) or via email at [sales@witt.com](mailto:sales@witt.com).

## Legend

### Best Seller

This icon indicates this is one of Witt's best selling products.

### Warranty

This icon indicates this product includes our 5-3-1 warranty; five years limited warranty against structural failure, three year limited warranty against failure of all TGIC polyester coated product surfaces, and one year limited warranty on any items not covered above.

### Quickship

This icon indicates this product is part of our Quick Ship program. Order between 1-20 of this product by noon and the product will be shipped within 48 hours.

### Made in USA

This icon indicates this product is made in the USA.

### Eco Friendly/Recycling

Witt Industries is focused on sustainability and products that are friendly for the environment. This icon denotes products that are friendly to the environment or promote recycling.

### Shipped by Truck

This icon denotes a product is too large or too heavy to ship by UPS, Fed Ex Ground, or air freight and must go by an LTL or common carrier truck freight.

**Truck Shipping**

### **Non-Cancelable Non-Returnable**

This icon indicates a product is not eligible to be canceled or returned once an order is received by Witt. There will be no exceptions to this policy for these products.

### **UL Listed**

This icon indicates the product has been reviewed by Underwriters Laboratories (UL) and determined that Witt has demonstrated the ability to produce a product that complies with UL requirements with respect to reasonably foreseeable risks associated with the product.

### **New Product**

This icon indicates this is a new product in our catalog.

### **ADA Compliant**

This product conforms to the Americans with Disabilities Act reach requirements within the accessibility guidelines outlined in section 4.2, Space Allowance and Reach Ranges.

### **OSHA Compliant**

This icon indicates a product is OSHA compliant with standard number 1910.141 for waste disposal containers.

# Sustainability

Witt Industries is committed to creating, designing and manufacturing sustainable products with the environment as a priority.

## Our Commitment to Sustainability

As a proud member of the United States Green Building Council (USGBC), Witt Industries is focused on developing products that are environmentally sound and aid in promoting sustainable work environments. Like the USGBC, Witt is committed to being an integral part of the initiative to ensure that everyone learns, works, and lives in a green building within this generation. Quality and Durability are hallmarks of our legacy. For more than 125 years, Witt has been in the business of building receptacles to address and control waste in our society and promote sanitary and ultimately, healthier habitats. We continue to bring that same dedication and zeal to our product development and sustainability efforts today. With more than 100 products focused specifically on recycling or sustainability, Witt has a large array of options to choose from when you are ready to advance your organization's environmental program.

## Why we use Eco-Friendly Materials

Witt utilizes pre and post-consumer recycled material in all of our products. This allows us to take material that is diverted from the waste stream and utilize it again during our manufacturing process. This diversion of waste material that can no longer be used for its original purpose – whether it is generated by residential or commercial use – allows us to not only reduce and reuse materials that would have been previously dumped into our nation's landfills, but also enables us to repackage those materials in an environmentally responsible and effective way to encourage and promote further environmentally responsible behavior.

## Plastic Content

One hundred percent (100%) of our plastic is post production recyclable and at least 75% of our pre-production plastic resin comes from recycled materials.

## Steel Content

Witt Industries uses recyclable 100% made in USA steel and in most cases, we use Galvaneal steel, for superior corrosion-resistance and scratch-resistant factors. The recycled content of steel varies by grade, but generally is greater than 75% post-consumer recycled material. Witt also uses stainless steel, one of the world's most durable materials, as featured in a number of our products. It is 100% recyclable at the end of its long life. Emissions created during the production of stainless steel have been reduced significantly over recent decades, reducing the environmental footprint of stainless steel production.

## Paint Impact

Witt's TGIC durable powder coat process is environmentally friendly because it does not emit any volatile organic compounds (VOCs). There are no harmful chemicals utilized during the painting process, which makes this the preferred, environmentally friendly painting method.

## How do Witt products support the LEED® Rating System?

LEED, or Leadership in Energy & Environmental Design, is transforming the way we think about how our buildings and communities are designed, constructed, maintained, and operated across the globe. Comprehensive and flexible, LEED is a green building tool that addresses the entire building life-cycle recognizing best-in-class building strategies.

At its core, LEED is a program that provides third-party verification of green buildings. Building projects satisfy prerequisites and earn points to achieve different levels of certification. Prerequisites and credits differ for each rating system, and teams choose the best fit for the project. Many of our products could potentially help designers and architectural teams earn LEED material and resource credits. Please contact your local LEED chapter or a Witt salesperson to learn more about our products and their impact on the building process and environment.

# Witt's History

In 1887, The Witt Cornice Tin/Slate Roofing Company was founded by George C. Witt near the banks of the Ohio River in Cincinnati, Ohio. At that time, there were over 3,300 manufacturing plants in Cincinnati and it was a time of growth, prosperity, determination, and ingenuity.

Business was booming in Cincinnati, and fellow businessmen of the era working alongside George Witt were focusing on business success in Cincinnati. These included Barney Kroger, opening his grocery store, Andrew Jergens Company, the Kahn's Company, and the William J. Merrell Company, the country's largest wholesaler of pharmaceutical supplies.

George's cornice tin company was growing nicely, but George was focused on what could help his company fill the gaps caused by the seasonality and uncertainty of the construction industry. George could not help but notice the piles of unwrapped garbage strewn in the streets by dogs, cats, rats and the wind. In the midst of all the debris – George Witt found the answer – cans! He could use the same machinery that was making his corrugated roofing for buildings, cut the metal, and bend it into cylinders, reinforce it at the top and bottom with bands and make a lid that would keep the animals out and the garbage in.

In 1899, George Witt patented the Witt corrugated ash can, shortened the company name to The Witt Cornice Company, and manufactured his first can. He also expanded the plant to hot-dip galvanize these cans and began providing galvanized coatings for products produced by other companies. In 1906, George decided to put more capital into the company and convert the entire company to the manufacture of cans. He raised the money by selling 30,000 shares of his Procter & Gamble stock. In 1907, Jesse Wilbur (J.W.), George's son, joined the business. Both father and son agreed on one important thing—The Witt Cornice Company should provide the best product possible to its customers and be ready to stand behind that product. All the advertising, postal card mailings and labels on the cans guaranteed that the Witt can would out-serve three to five of the ordinary cans available. "Witt cans are the original corrugated cans: imitated but never duplicated", the ads stated.

The cans carried the Good Housekeeping Institute approval, a prestigious designation of its time.

The Witt Cornice Tin/ Slate Roofing Company was located on Walnut St. near Ninth St. in downtown Cincinnati, Ohio

Witt products received the Good Housekeeping Institute seal of approval in the early 1900's

Witt's success as a leading manufacturer in the can business continued. Even during the Great Depression, not a single employee was laid off. Witt was known for its aggressive sales, marketing and advertising tactics, and was featured in such popular magazines as National Geographic, Good Housekeeping and Cosmopolitan.

In 1940, as the Cincinnati Reds were winning the World Series, Witt was scoring a winner too with the introduction of its patented push top can lid. In 1950, J.W. Witt turned over the reins to his son, Jim. Acquisitions took place in the 1960's and Witt acquired a galvanizing business as well as the Dan-Dee Basket division of Erie Art Metal. The 1960's brought decorator waste baskets for offices as well as the versatile Push Top Receptacles. In 1962, the company celebrated its 75th anniversary by moving to a 20,000 square foot expansion to its Steel Place headquarters. Witt's product line changed to meet customers' needs while the company's dedication to quality and service remained steadfast and constant. In 1971, Bob Wydman, Mary Witt's husband and J.W.'s son-in-law, took the role of Witt Chairman. In 1984, Bob Wydman passed away unexpectedly. Marcy Wydman, Mary, and Bob's daughter took over the company and remained in control until the business was sold to The Armor Metal Group in 2007. The Armor Metal Group, Inc. moved the business to its more than 300,000 square foot ISO 9001:2008 registered facility in Mason, OH. The company is proud to be a National Women's Business Enterprise Certified company with a diverse line of businesses specializing in metal fabrication.

Witt Industries continues to investigate potential markets and strives to expand its share in existing marketplaces through the same commitment to quality and service that it has shown since its inception in 1887. It is our "Can-Do" attitude and "imitated but never duplicated" manufacturing expertise that still makes Witt an industry-leading, best-in-class manufacturer of waste and recycling receptacles today – more than 125 years since George C. Witt patented the first can.

Although the Witt product line has changed through the years, the company's dedication to quality has remained steadfast

# Indoor Decorative Series

Witt's Indoor Decorative Series adds an upscale look to your facility with this line of modern, aluminum-built receptacles.

Quickship

AL35-CLR

AL35-SVN

AL18-CLR

AL18-SVN

# Aluminum Series Standard

Adds an upscale and modern look to your facility.

Designed for convention centers, suites in arenas and stadiums, hospitality/hotel venues, malls, and office parks

- Made with heavy gauge aluminum
- Corrosion-resistant and fire safe
- Available in two finishes, satin clear coat or silver vein
- Silver vein has a speckled finish that is highly scratch resistant
- Satin finish is free from blemishes and spinning lines
- The two-piece design creates an overlap area and eliminates the visibility of plastic liners
- Comes standard with rigid plastic liner
- Hole openings measure 8.25" for the AL18's and 9" for the AL35 units

AL18-CLR-R

AL35-CLR-R

# Aluminum Series Recycle

An elegant solution for your indoor recycling needs.

Ideal for suites in arenas and stadiums, shopping malls, upscale office complexes, convention centers, hotel/hospitality venues, and hospitals

- Made with heavy gauge aluminum
- Corrosion-resistant and fire safe
- Available in satin clear coat finish
- Satin finish is free from blemishes and spinning lines
- The two-piece design creates an overlap area and eliminates the visibility of plastic liners
- Comes standard with rigid plastic liner
- Hole openings measure 8.25" for the AL18's and 9" for the AL35 units
- Recycle decal included

11RR-361631 (3-opening)

# Fiberglass Recycling

Designed to withstand the daily rigors of food courts and heavy use recycling needs.

Ideally suited for schools, cafeterias, large facilities, airports, and shopping center food court applications

- Durable fiberglass construction will last for years
- Customizable top allows you to choose the openings you need – one, two, three, or four openings
- Available in a wide range of colors including all standard fiberglass colors shown on page 100
- Great for companies seeking “Green” compliance
- Includes durable recycling labels
- Includes rigid plastic liner for each opening
- Available in 16, 32, 48, and 64 gallon capacity
- Openings available:
  - 4" round
  - 5.5" round
  - 9.5" round
  - 11" X 2" slot
- Decal options: paper, waste, cans, glass, plastic, bottles/cans, and co-mingle

11RR-481631 (4-opening)

Item Number	Description	Capacity	Dimensions	Weight
11RR-121631	One opening recycling unit w/ plastic liner	11 Gal.	12" x 16" x 31"	27lb.
11RR-241631	Two opening recycling unit w/ plastic liner	22 Gal.	24" x 16" x 31"	45lb.
11RR-361631	Three opening recycling unit w/ plastic liner	33 Gal.	36" x 16" x 31"	63lb.
11RR-481631	Four opening recycling unit w/ plastic liner	44 Gal.	48" x 16" x 31"	79lb.

## Colors

Single and two color options & custom color match available.

# Outdoor Poly-Lite Crete Series

A lightweight and durable alternative to concrete receptacles.

Perfect for retail shopping centers, apartment or multi-unit housing exteriors, universities, parks, and city streets

- 70% lighter than comparable concrete products
- Reduced shipping costs and less in-transit damage
- Hide-A-Butt™ top keeps cigarette butts out of sight
- 100% recycled content ABS liner supplied with all Poly-Lite Crete Receptacles
- Available in round and square shape for maximum selection
- Available in white, gray, or sand stone finish or choose from any color combination of our fiberglass color options

non-cancelable  
non-returnable
