CATALOG

Impact is one of the largest non-chemical, commercial cleaning and safety product manufacturers and suppliers in North America. Our relentless commitment to making a daily difference in the operations of customers and their end users has shaped our value proposition over the past 50 years.

Impact has earned a reputation, coast-to-coast, as the “go-to” supplier in the industry, arising from a set of distinctive factors:

- An expansive, one-of-a-kind, product offering
- Quality design, tooling, and manufacturing processes
- Advanced supply chain systems and rapid order fulfillment
- Value added services include private label and packaging
- Award winning customer service and support
- We work with customers to design innovative solutions

Impact's mission is clear: to outfit distributors and wholesalers with products, solutions and knowledge centered on performance and cost-savings. This drive takes the Impact brand to a wide variety of end-user markets all across North America:

- Food Service
- Contract Cleaners
- Hospitality Industry
- Office Buildings
- Healthcare Facilities
- Industrial Facilities
- Government
- Schools

**impact**

The force that keeps you moving

TABLE OF CONTENTS

6 - 31

Lambswool Dusters

100% Lambswool duster optimizes cleaning, and prevents streaks and scratches.

- Ideal for cleaning high or difficult places like corners and ceiling fans
- Attracts dust like a magnet to the washable fibers
- White handles with an assortment of different color heads

ITEM	DESCRIPTION	HEAD SIZE	CASE QTY.	MIN. ORDER
3107	Short - 20"	3 1/2" L	12/cs.	1 cs.
3100	Medium - 24"	11" L	12/cs.	1 cs.
3103	Long - 28"	11" L	12/cs.	1 cs.
3105	Telescopic - 30-45"	12" L	12/cs.	1 cs.
3106	Extended Twist-and-Lock - 33-60"	11" L	12/cs.	1 cs.

Polywool Dusters

Polywool fibers create an electrostatic charge to better attract and hold dust.

- All polywool dusters are non-allergenic, fully washable
- Items #3110 and #3120 have metal handles with a white plastic coating and flexible heads
- Item #3125W has a metal handle with black plastic coating

ITEM	DESCRIPTION	HEAD SIZE	CASE QTY.	MIN. ORDER
3110	Duster - 23"	13 1/2" L	12/cs.	1 cs.

Microfiber Waffle Weave Bar Towels

Virtually lint-free, this woven design provides excellent surface contact.

- Absorbs more than seven times its weight in liquid, much more than conventional bar towels
- Extremely durable - will last through hundreds of wash cycles
- Microfiber is resistant to bacteria growth

ITEM	COLOR	SIZE	CASE QTY.	MIN. ORDER
LFWT1000	White	14" L x 17" W	12/bg.; 15/bgs./cs.	1 bg.

Microfiber Dual-Textured Bar Towel

Two sides with alternate weave patterns double the usefulness of this towel.

- Ribbed side has deep channels, trapping larger particles for heavy-duty clean up
- Smooth side is ideal for lighter jobs like dusting or wiping down surfaces
- Synthetic microfiber is resistant to bacteria growth

ITEM	COLOR	SIZE	CASE QTY.	MIN. ORDER
LFRT1000	White	14" L x 17" W	12/bg.; 15/bgs./cs.	1 bg.

Mesh Laundering Bag

Perfect for containing your mopping and towel products while laundering.

- Drawstring closure secures bag contents
- Use this bag to protect your launderable cleaning items
- Synthetic material allows for quick drying

Cleaning Surfaces

Remove the presoaked cleaning cloth from container and wring out excess fluid and cleaning agent.

Clean and wipe surface area.

Dry Dusting

Use clean, dry microfiber cloth, mitt or duster.

Clean and wipe surface area.

Cleaning Glass or Stainless Steel

Dampen glass towel with normal tap water.

Clean the mirror, window, other glass surfaces or stainless steel surfaces with glass cleaning cloth.

Dry Mopping

Place dust mop on floor, gray side down. Press mop frame against mop so the Velcro® system fastens.

Dust floors, beginning at far edge of room and proceeding towards center in figure eight pattern.

Wet Mopping

Proceed with pre-moistened mop heads (white side up) to bucket filled with recommended 150-200cc of water and chemical per mop. Press mop so Velcro® system fastens.

Begin by mopping edge of base-board from front to back of room. At far edge of room, begin mopping in recommended figure "8" pattern. Mop restrooms last.

Care Instructions: All microfiber products can be laundered extensively. Do not use bleach or fabric softener.

Metal Squeeze Wringer

This wringer is constructed of high-quality galvanized steel to prevent rusting.

- Two-piece tubular steel handle and solid 5/8" square steel shaft
- Fully vented openings on all sides, allow quick water release
- Accommodates 20-40 oz. mop heads
- Superior, large angle linkage system allows maximum force throughout the wringing cycle

Workplace Hazards

Slips, trips and falls in the workplace exact a substantial toll in terms of death, personal injury and suffering, workers' compensation, loss in productivity, and civil liability.

The **2013 Liberty Mutual Workplace Safety Index** indicates that falls on the same level were the second leading cause of all workplace injuries in 2013, is more than \$6.6 billion.

According to the Bureau of Labor Statistics (BLS), the majority of fall-related injuries (65 percent) occur as a result of falls from same-level walking surfaces.

What are the Potential Hazards Associated with Walking/Working Surfaces?

Slip and fall incidents include:

- Walkways that are wet, oily, or otherwise contaminated
- Floor surfaces that are in disrepair
- Loose or unanchored mats or rugs
- Spills and weather hazards (such as ice, rain or snow)
- Lack of employee training
- Inappropriate footwear

The **ANSI Standard for the Provision for the Slip Resistance on Walking/Working Surfaces (ANSI A1264.2-2012)** applies to industrial and workplace situation and sets forth common and accepted practices for providing reasonably safe walking surfaces:

- Consideration shall be given to the slip resistance of footwear to maximize traction.
- Mats and runners shall be used in areas where individuals may encounter slippery contaminants or foreign materials on the floor surface.
- A housekeeping program, including appropriate cleaning and maintenance procedures and employee training, shall be implemented to maintain safe walking surfaces (see products on page 53 and our entire floor care line.)
- Warnings shall be provided where slip/fall hazard has been identified (see pages 44, 45 and 66.)
- Make sure you are compliant.

Impact has the products you need to avoid these issues!

PRIVATE LABEL

GENERAL

Submit camera-ready artwork or reproducible artwork which can be enlarged or reduced. Definition of camera-ready/photo reproducible artwork: black on glossy white background with sharp images. **PLEASE NOTE:** Photocopies, business cards, drawings, letterhead, decals, etc. are NOT camera-ready. For electronic submission of artwork, submit a vector file in EPS, Adobe Illustrator (AI), CDR or TIF format through email or on CD-ROM. Low-resolution artwork from a website is not acceptable.

PROCESS

H - Hot Stamp P - Pad Print S - Silkscreen

COLORS

Hot stamp & pad print - dark blue, light blue, red, brown, black, orange, green, yellow, gray, metallic gold, burgundy, and white.

Silkscreen - process blue, dark blue, light blue, reflex blue, green, yellow, red, orange, brown, purple, magenta, gray, burgundy, teal, and maroon. PMS matching available by providing PMS number*. Up to 3-color printing on plastic bottles. Recommend 1-color imprint on 5032P bottle.

***Note: PMS matching only provided on silkscreen.**

UV INK

All plastic bottles and containers are screened with UV inks. UV inks produce a sharper, glossier image and give superior chemical resistance and ink durability.

8750 Vanguard Receptacle	S	48	6" h x 8" w	\$1.60/ea. per side

Please note: special labeling on plastic mop handles is available upon request. Call customer service for details.

Private Label Guide - Safety Signage

General

Submit camera-ready artwork or reproducible artwork which can be enlarged or reduced. Definition of camera-ready/photo reproducible artwork: black on glossy white background with sharp images. **PLEASE NOTE:** Photocopies, business cards, drawings, letterhead, decals, etc. are NOT camera-ready. For electronic submission of artwork, submit a vector file in EPS, Adobe Illustrator (AI), CDR or TIF format through email or on CD-ROM. Artwork pulled off a website is not acceptable.

TriVu® 3-Sided Signs:

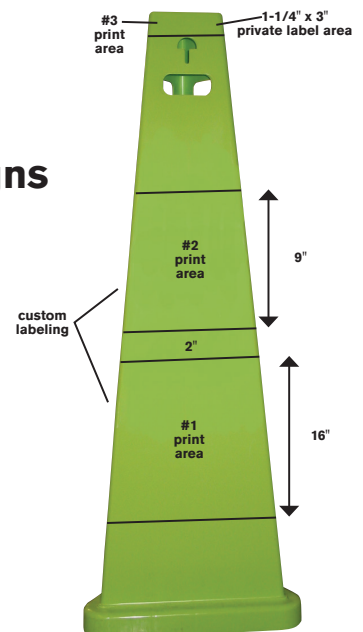

90 sign minimum. Location - print area 1 & 2 (see right) using one large screen.

Size of imprint area is 9" x 16" as shown with 2" space in between. All 3 sides printed. Up to 2 colors, 1 per print area.

Custom Merchandise

Custom made products cannot be returned. A product specification form must be signed with your order.

10 Facts About GHS

1. GHS stands for the Globally Harmonized System of the Classification and Labeling of Chemicals
2. It is a set of guidelines for ensuring the safe production, transport, handling, use and disposal of hazardous materials
3. The GHS was developed by the United Nations, as a way to bring into agreement the chemical regulations and standards of different countries
4. The U.S. officially adopted the GHS on March 26, 2012
5. The GHS is not a global law or regulation. It is a system. It is a set of recommendations or collection of best practices
6. Countries can pick and choose those pieces of the GHS they wish to incorporate into their own regulations
7. To date, over 65 countries have adopted GHS or are in the process of adopting GHS
8. The most noticeable changes brought to GHS for most organizations will be changes to safety labels, safety data sheets, and chemical classification
9. One example is the name change of MSDS sheets. GHS now calls them SDS sheets
10. Finally, GHS is meant to be a logical and comprehensive approach to:
 - defining hazardous chemicals
 - creating classification processes that use available data on chemicals for comparison with the defined hazard criteria
 - communication hazard information in a prescribed and uniform way

HANDWASHING

"Hand washing is the single most important means of preventing the spread of infection¹."

~U.S. Center for Disease Control

Did you know...

- ▶ Hand washing is still recommended when gloves are worn¹
- ▶ Each year, more than 164 million school days are lost due to illness¹
- ▶ The number of germs on your fingertips doubles after you use the toilet²
- ▶ Germs can stay alive on hands for up to three hours²
- ▶ 92% of adults say they always wash their hands, but only 77% actually do³
- ▶ Many outbreaks of foodborne illness such as salmonella and E. coli, can be traced to unwashed or poorly washed hands³
- ▶ It is estimated that there are about 76 million foodborne illnesses each year in America, resulting in 325,000 hospitalizations and 5,000 deaths - government statistics indicate that at least 25 percent of these illnesses are due to improper handwashing²

3. American Society for Microbiology, 2007
Handwashing Survey

ProGuard®

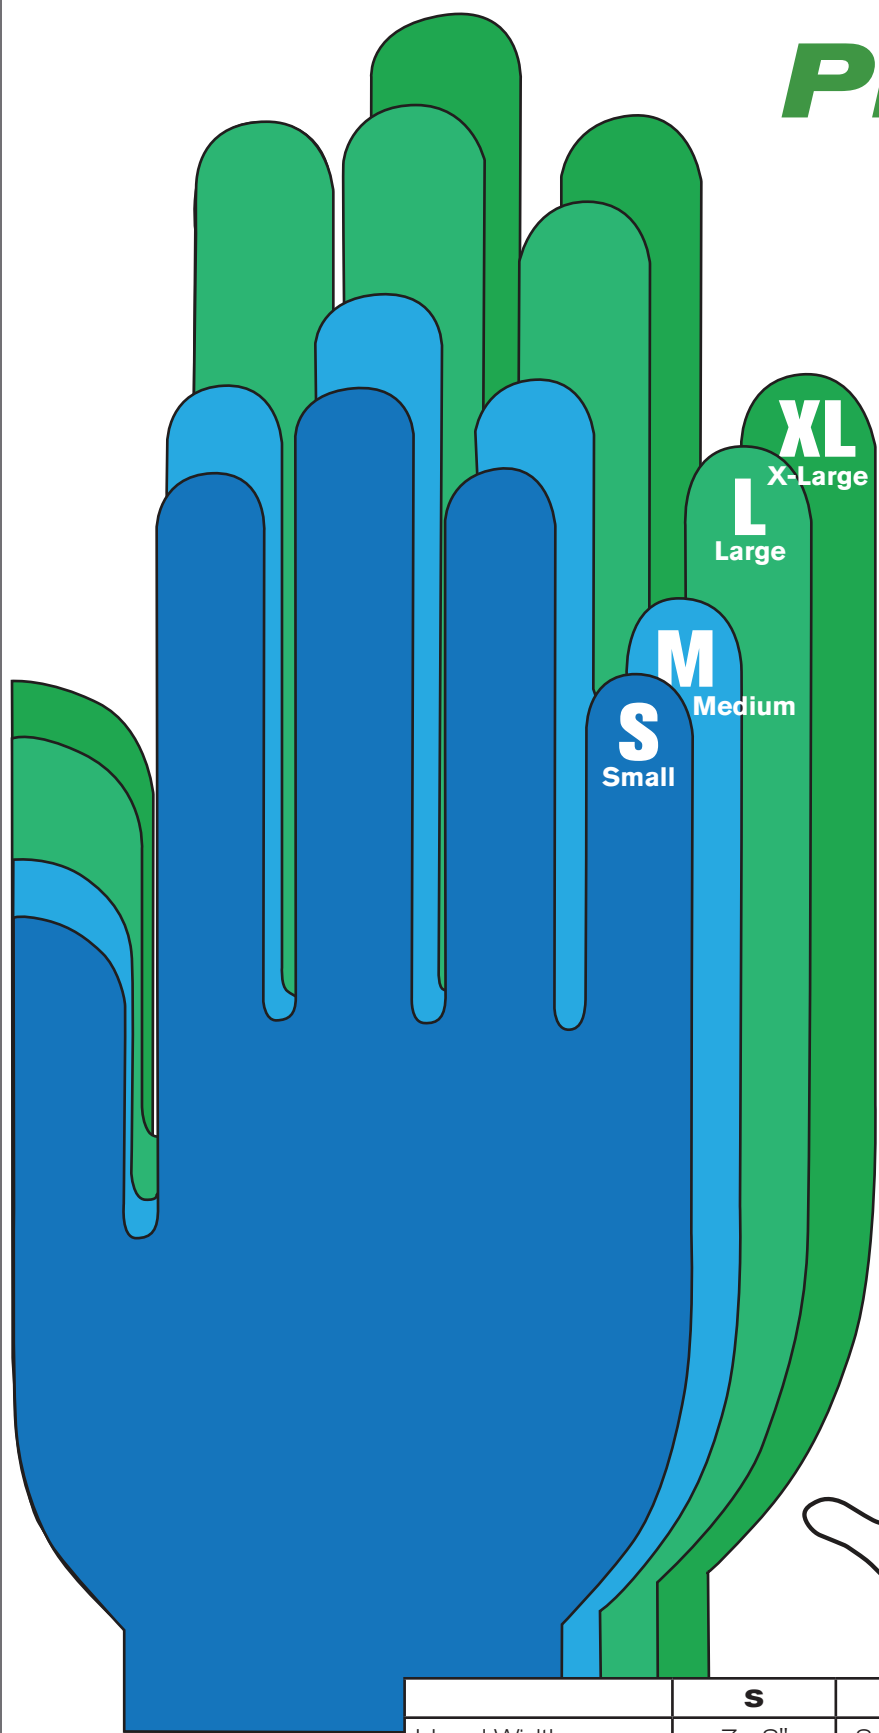

How to choose proper chemical resistant gloves

- ▶ Identify the chemical you are working with.
- ▶ Consult the Safety Data Sheet (SDS) on the chemical.
- ▶ Check the chemical resistance guide for gloves.
- ▶ Determine the physical factors involved in the glove application:
 - Dexterity and flexibility
 - Resistance to puncture and snags
 - Abrasion resistance
- ▶ Determine the needed glove length.
- ▶ Test glove.

How to find the perfect fit for your hand

Proper fitting gloves are important. Gloves too large are uncomfortable, hard to use and can be hazardous. Gloves too small are binding and cause hand fatigue.

To determine proper size, place your hand on the diagram to the left.

Measurement should be taken around the fullest part of the hand, not including the thumb. If right-handed, use right hand and vice versa.

	S	M	L	XL
Hand Width	7 - 8"	8-1/2 - 9"	9-1/2 - 10"	10-1/2 - 11"

Factors that can adversely affect the life of chemical resistant gloves

Permeation - Rate at which a chemical passes through the glove material.

Breakthrough - The elapsed time from initial chemical contact on the glove surface to actual detection of chemical in the inside of the glove.

Degradation - Change in glove properties due to chemical contact.

Swelling, softening, hardening, drying and other undesirable effects are some examples of degradation.

Latex allergen information

LATEX GLOVE CAUTION STATEMENT: This statement appears on the packaging of all latex gloves.

CAUTION: This product contains natural rubber latex which may cause allergic reactions. Users with a known sensitivity to rubber or latex products should avoid contact. **IF YOU EXPERIENCE A REACTION TO THIS PRODUCT, DISCONTINUE USE AND SEEK MEDICAL ATTENTION.** Reactions may include such phenomena as watery eyes; wheezing, hives, a rash, welts, redness, dryness, tingling or other skin irritations; hay fever-like symptoms such as sneezing, runny nose, itching throat or nose; or, tightness of the chest..

This symbol appears on the packaging of all Impact's inner carton glove packaging that contain no latex. These gloves are 100% latex free.

Disposable Glove removal

You must follow a safe procedure for glove removal, being careful that no pathogens from the soiled gloves contact your hands:

- ▶ With both hands gloved, peel one glove off from top to bottom and hold it in the gloved hand.
- ▶ With the exposed hand, peel the second glove from the inside, tucking the first glove inside the second.
- ▶ Dispose of the entire bundle promptly.
- ▶ Remove gloves when they become contaminated, damaged, or before leaving the work area.
- ▶ Wash hands thoroughly.

* basic chemicals used for cleaning.

Latex = made from natural rubber from rubber trees

Vinyl = form of plastic (latex free)

Nitrile = form of plastic, more puncture and chemical resistant

KEY

E = Excellent

P = Poor

G - Good

NR = Not Recommended

F = Fair

Note: This chemical resistance chart is presented as a guide only. This does not consider the permeability of gloves, chemical combinations, temperature, length of time that the glove is in contact with the chemical and thickness of the glove. These factors will alter or effect the performance of the glove. Actual on the job testing of gloves is recommended.

Always read Safety Data Sheets before using any chemicals.

**OSHA Standard 29 CFR 1910.138 Hand Protection**

Employers shall select and require employees to use appropriate hand protection when employees' hands are exposed to hazards such as those from skin absorption of harmful substances; severe cuts or lacerations; severe abrasions; puncture, chemical burns; thermal burns and harmful temperature extremes.

OSHA Standard 29 CFR 1910.133 Eye Protection

Employees must use appropriate eye or face protection when exposed to hazards from flying particles, molten metal, liquid chemicals, acids, chemical gases or vapors. Side shields are required when there is a hazard from flying objects.

OSHA Standard 29 CFR 1910.151 Eye/Face Protection

Requires facilities for drenching and flushing of eyes or face for any person that may be exposed to corrosive chemicals. Meets ANSI Z358.1-2004 Safety Standards.

OSHA Standard 29 CFR 1910.136 Foot Protection

Employees must wear protective footwear in areas where there is danger of foot injuries due to falling or rolling objects, piercing of the sole, chemical or electrical hazards. Must be in compliance with ANSI Z41-1991.

OSHA Standard 29 CFR 1910.135 Head Protection

Employers must wear protective helmets when working in areas where potential injury to the head from falling or flying objects or electrical contact.

FDA Food Code 2-402.11 Hair Restraints

All food employees shall wear hair restraints such as hair coverings or nets, beard restraint, and clothing that covers body hair that are designed to be worn to effectively keep their hair from contacting exposed food.

OSHA Standard 29 CFR 1910.134 Respiratory Protection

Respirators must meet NIOSH approval for respiratory protection against most dusts. To protect from occupational diseases from conditions that are immediately dangerous to life caused by breathing air contaminated with hazardous levels of dusts, fog, fumes, mists, gases, smoke, sprays and vapors.

OSHA Standard 29 CFR 1910.95 Ear Protection

Requires hearing protection must be available to all workers exposed at or above 85 decibels over an 8 hr. period.

OSHA Standard 29 CFR 1910.1030 Bloodborne Pathogen

This standard is designed to help prevent workplace exposure to bloodborne pathogens (not limited to HIV-1 and HBV). Section (B) (3) states where there is occupational exposure, the employer shall provide appropriate Personal Protective Equipment (PPE) to employees who come in contact with blood or bodily fluids.

OSHA Standard 29 CFR 1910.151 First Aid Kit

This standard is designed to help with workplace accidents. OSHA Standard 29 CFR 1910.151 requires kits for any employer with 10 or more employees.
