

Tolco Corporation

50 Years of Excellence

ABOUT US

Tolco Corporation is so much more than just trigger sprayers! After having spent the last 50 years developing the most innovative and high quality trigger sprayers in the industry, it is easy to see why Tolco is synonymous with trigger sprayers. However, Tolco sells over 500 products to the Janitorial, Foodservice, Industrial, Beauty & Barber, Animal Health, and Consumer Products markets.

Tolco Corporation was founded by William E. Spengler in March, 1961. We began with just one product, the D-22 drum pump, which we still sell today. It was that best in class product which would be the foundation of our success. In the years that followed we began developing the products that would define their categories. The D-22 was just the start, followed by the 320 trigger sprayer, the 942 pump-up sprayer, and continuing today with the award winning line of EcoChoice® products. We are committed to provide you with exciting, innovative products well into the future.

Mr. Spengler was fond of saying, "Initially, all orders were shipped "F.O.B. - from our basement." Much has changed since 1961, but one thing that hasn't is that Tolco is still a family owned and operated business.

Tolco is a family business and everyone here is family. The average employee has been with Tolco over 10 years, and a few have been here 20 plus years. All of us here at Tolco embrace the company philosophy: "Be Great – Have Fun"

From our family to yours, thank you for your continued support. We sincerely appreciate your trust and confidence. All of us at Tolco Corporation look forward to providing our customers with another 50 Years of Excellence.

If you recycle plastics or dispose of them in a landfill, EcoChoice® has your best environmental intentions covered. EcoChoice® products will biodegrade* when disposed of in a municipal landfill and will not affect a product's recycling characteristics.

EcoChoice® Products will biodegrade in a landfill, residential composting, commercial composting, or when buried in the ground, tilled into the soil, etc. In short, when it is time to dispose of an EcoChoice® product, your options to do something good for the environment are almost limitless. And with the cost being the same as non-biodegradable items of the same type, why wouldn't you do this?

-  30 million tons of plastic waste is generated in the USA each year
-  Only 7.1% of all plastic waste generated was recycled in 2008
-  Over 90% of all plastic waste generated was discarded
...approximately 28 million tons of plastic waste was not recycled.

Independent studies prove that EcoChoice® products will biodegrade in a landfill and help regenerate soil by leaving behind water, CO₂, CH₄ and humus.

EcoChoice® products are fully recyclable in the current recycle stream.

EcoChoice® products have the same long life of our standard products and are NOT affected by light, heat, or humidity like Oxo Degradable and Bioplastics.

Maybe the best part is that EcoChoice® products cost no more than similar, non-biodegradable products. Why wouldn't you do this?

*Biodegradation as per ASTM D5511-02 standard test determining anaerobic biodegradation of plastic materials under hi-solids anaerobic conditions independently conducted and analyzed by an independent Research Lab.

Every year the ISSA sponsors a competition of the industry's most innovative products. In 2011 Tolco submitted its line of EcoChoice® biodegradable plastic products. These awards are voted on by distributors and end users. When the ballots were all counted, Tolco won the Technology Innovation award. Winning this award, while we were celebrating our 50th anniversary, was a tremendous honor.

So what is so innovative about biodegradable plastics? A lot!

EcoChoice®	Bio-based Plastics	Why this matters?
Contains the same type and amount of resin as the product it replaces plus the added benefit of EcoChoice®.	Some percentage of the product is substituted with a new resin which is derived from "renewable" source.	<ul style="list-style-type: none"> ♦EcoChoice® is un-altered from the product it replaces, other than the ADDED benefit of our proprietary additive. ♦EcoChoice® products have the same performance, durability, and recyclability as the products they replace. ♦Bio-based plastics REMOVE a percentage of the traditional plastic and substitute it with a new compound. ♦The reformulation of Bio-based plastic products may alter the performance of the products they replace.

PRIVATE LABEL IMPRINTING

Create Your Brand

Why create a private brand?

Your products are seen by countless individuals every day! A private brand helps direct them to you. It also helps ensure that you get more repeat business since YOUR brand and YOUR company information is on the product. Would you rather buy a product with no labeling or one that tells you exactly where it is from?
